## **DETAILED ACTION**

1. Applicant's amendment, filed March 17, 2008 has been entered.

- 2. Claims 1-42 have been canceled.
- 3. Claims 48-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In each of claims 48 and 49, line 3 the phrase "and/or" is ambiguous, in that it is not clear whether the phrase is intended as all inclusive(both), alternative(either), or mutually exclusive(only one or the other).
- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 43-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nambu et al(EP 1179627). Nambu discloses a material for purification of industrial wastewater comprising substantially all of the subject matter set forth in Applicant's claims above. Note the use of a metal chelate forming fibrous resin, which may be of natural fiber, such as cellulose, and can be in the form of a sheet, mat, or non-woven fabric. The use of such a fiber in removing metal ions from solution in a semiconductor polishing slurry would have been an obvious application, since used polishing slurry is an industrial wastewater, and is known to contain unwanted metal contaminants which require removal to prevent wafer contamination.

Application/Control Number: 10/549,294

Art Unit: 3723

6. Applicant's arguments filed March 17, 2008 have been fully considered but they are not persuasive. Applicant has amended the independent claims to include a recitation of the functional group "which enables to maintain a main constituent" of the polishing slurry. The obviousness rejection over Nambu et al is still deemed to be valid. Nambu discloses a material for purification of industrial wastewater which uses a metal chelate forming fibrous resin, which may be of natural fiber, such as cellulose, and can be embodied as a sheet, mat, or non-woven fabric. The use of such a fiber in removing metal ions from solution in a semiconductor polishing slurry would have been an obvious application to those of ordinary skill in the wastewater purification art, since used polishing slurry is an industrial wastewater, and is known to contain traces of unwanted metal contaminants which require removal to prevent wafer contamination.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, from 8:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail, can be reached at (571) 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

Application/Control Number: 10/549,294 Page 4
